- Bevel Gear Cutting
- Worm Gearing
- Gear Grinding
- Slotting
- Splinning
- Gearbox Reconditioning
- 3D Inspection Scanning
- Welding

Adlam Engineering was established in the early 70's with the aim of becoming the foremost leader in the field of custom machine components and gears. This position was achieved and retained by successfully combining extensive knowledge of the industry with the use of modern technology. The company is able to provide designed and manufactured solutions to a wide range of industries, including mining and general engineering. Adlam Engineering is a manufacturer and repairer of a comprehensive range of items as per each customer's specification and drawings, or by reversed engineering.
